GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statements of Water Diversion and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockponds Constructed Prior to 1969"
- "Appropriation of Water in California"

Dear Mr. and Mrs. Beard:

STATEMENT OF WATER DIVERSION AND USE NUMBER 10842

Thank you for your letter of August 5, 1996 informing us that you are the new owners of property on which water is diverted and used under the above Statement of Water Diversion and Use (Statement) number. Our records will be updated to show the Statement in your names unless we hear differently from the previous owner within 15 days of the date of this letter.

The next Supplemental Statement for filing will be sent to you in January 1997 to cover use in 1994, 1995 and 1996.

If you have any questions, please contact me at the above telephone number.

Sincerely,

NOTICE TO LICENSEE

Enclosed is your Report of Licensee form for 1992, 1993, and 1994.

You are reminded that one of the requirements under which you received your license was that "Reports shall be filed promptly by licensee on appropriate forms which will be provided for the purpose from time to time by the Board." Failure to complete and return this form will constitute noncompliance with the terms and conditions of your license.

The enclosed is a revised and shortened version of the old 8 1/2" x 14" reporting form. We have also converted to a new database system to input water right data onto this form. We ask for your assistance in correcting any errors that may have existed in our database. Following the completion of the report form, please carefully review the information in the upper half of the reporting form and note any corrections or additions that may be needed (e.g., current ownership, address, assigned agent, etc.).

Statement No.

My Husband and I just purchased the property owned by Roger & Claudette Williams. The property located at 1004 Barney Way, West Point, Calif has a water right # 10842. Would you please change the ownership of this right to our name. If you need any more information please give us a call.

Thank-you,

Vedina Beard

1981-1982

2. $\frac{1}{2} \log \frac{1}{2}$

1. The first part of the paper discusses the importance of maintaining accurate records of all transactions, including sales, purchases, and expenses. It emphasizes the need for a systematic approach to record-keeping, such as using a ledger or accounting software, to ensure that all data is properly captured and organized.

2. The second part of the paper focuses on the analysis of the recorded data. It describes various methods for calculating key financial ratios, such as the current ratio, debt-to-equity ratio, and return on assets. These ratios are used to assess the company's financial health and performance relative to its peers and industry standards.

3. The third part of the paper discusses the importance of regular financial reporting. It explains how the recorded data is used to prepare financial statements, such as the balance sheet, income statement, and cash flow statement. These statements provide a comprehensive overview of the company's financial position and are essential for internal decision-making and external communication with stakeholders.

4. The fourth part of the paper addresses the challenges of financial management and offers practical solutions. It discusses the importance of budgeting, forecasting, and monitoring cash flow to ensure the company's long-term sustainability. It also highlights the need for effective communication and collaboration between different departments to ensure accurate financial reporting.

5. The final part of the paper concludes by summarizing the key findings and emphasizing the importance of a strong financial management system for the success of any business. It encourages companies to adopt a proactive approach to financial management and to regularly review and update their financial policies and procedures.
